Sprocket Replacement

Tools:
- Screwdriver
- Wrench
- Pliers
- (2) 9/16" or 14mm

Use Concept2 PN 1112

1. Start by removing the screwdriver and loosening the outer sprocket.
2. Carefully pull the outer sprocket off.
3. Use the wrench to loosen the inner sprocket.
4. Remove the inner sprocket.
5. Install the new sprocket in reverse order.
6. Tighten the inner sprocket with the wrench and the outer sprocket with the screwdriver.
Replace with Concept2 PN1112

Finger tighten only.
