

Photographic Requirements

These are a few basic guidelines for submitting digital photographs to Concept2 for use on the Concept2 website or in printed materials:

1. Most digital cameras allow you to change the image quality and resolution of your photographs. Use your camera's **highest resolution setting**. This will produce the best image suitable for reproduction.
2. Whenever possible compose your photos in a well-lit, non-distracting setting.
3. Submit all photos with identification. Please list the names of the people in the photo and the location from where it was taken.
4. If you are not able to provide a digital photo, you may submit a hard copy print, adhering to #2 and #3 above.

Email digital photos to:
Tracy Desrocher
tracyd@concept2.com

Mail hard copy prints to:
